TRAIL REPORT

We barely received an inch of snow over the weekend, so we are still dealing a very thin yet firm base. There are thinner spots throughout the trail system. Come out and ski if you like. We are still setting up the ski shop and will open once we get a significant amount of snow to sell tickets and rent skis and snowshoes. At this time, Fat biking and snowshoe conditions are pretty good on the hiking trails.

We will update this report when conditions change.

We ask that you don't walk on trails in order to preserve our base.

Think Snow!!
